In re Application of:

JURGEN ENGELBRECHT et al

Group Art Unit:

Serial No.: 10/539,112

Examiner:

Filed: June 16, 2005

For: DISPENSING DEVICE FOR FLUID SUBSTANCES

INFORMATION DISCLOSURE STATEMENT

Honorable Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

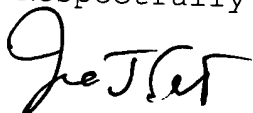

Sir:

Attached is the Search Report of the corresponding PCT application, together with a Form PTO-1449 and one German language reference.

DE 880532 U1 is directed to an adapter for connecting two cartridges to a two-component mixing means for a cartridge squeezing device. The cartridges are connected without cutting off the sealing cap of the mouth neck, which is effected by recesses and lugs 43, 23; 26, 27 at the adapter body, as shown in Figures 1 and 4, and in the alternative shown

in Figure 3. When axial squeezing pressure is exerted, the cartridges are pressed against the adapter in the axial and forward directions, and thereby the sharpened hollow needles which are connected with the adapter body cut the front wall of the respective cartridge so that material from the cartridges can flow through the hollow needles and the outlet conduits of the adapter into the mixing means.

Respectfully submitted,

Ira J. Schultz
Registration No. 28666
